Street Name Signage Project – Timeline and Summary

We are excited to announce that we have started refreshing many of our faded street name signs throughout the neighborhood.

Many of our signs are 20-25 years old and have faded with the elements of time. Our trusted sign vendor will work with us to replace the street name portion. We will send him approximately 20-30 signs at a time. Our intention is to have the street name returned to the top of the pole within 7-10 business days (faster if possible). We appreciate your patience as we update these signs.

This project will continue for multiple years and is paid for out of the reserve replacement fund. Money has been set aside each year for this specific project and is an important part of the community's curb appeal and safety. Our Operations Team is able to remove and reinstall the signage, reducing our costs on this endeavor.
